CREATING/UPDATING ORGANIZATION-SPECIFIC POSITIONS

1. After navigating to the organization's roster, select "Manage Positions" at the top of the page to add and/or edit positions and their access to the organization's Involvement Network page.

2. You can create a position or edit position permissions by selecting the title of the position. Member and Primary Contact cannot be changed.

Finance	Finance	Officer	Active
Member	Member	Member	Active
President	President	Officer	Active
Primary Contact	Primary Contact	Member	Active
Public Relations	Public Relations	Officer	Active
Risk Management	Risk Management	Officer	Active

3. From here, you can name the position and/or determine how much access is permitted. For example, you may want your Advisor to have "All Access" but you may want your Events Chair to have "Limited Access" to certain functions, such as events.

Users who fill Positions with "No access" will not be able to manage any tools within the organization. "All access" allows Position holders to manage every tool within the organization's site - these are the users who will have the most power within your organization. Limited access allows you to select the level of access the Position should have for each tool within the organization site. When you are finished determining the level of access for the position, click "Create."

Note: Once the position has been created, it may take a few minutes before it can be assigned to a member.

Tip: If you do not see the position immediately, give the system a few minutes while the position is being generated.
